

# The Woodlands Lawn Care Calendar

Action	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	
<b>Water</b>	Turn off programmable sprinkler system			1/2" a wk including rain		Irrigate max 1 inch per week including rain.				1/2" a wk including rain	Turn off programmable sprinkler system		
<b>Mow</b>	Mow when necessary to prevent winter weeds from flowering			Mow once a week or less. Set your mower to its highest cutting level.								Mow when necessary to prevent winter weeds from flowering	
<b>Weed Control</b>		Apply pre-emergent once soil temps are above 50 degrees		Apply post emergent as needed - no Weed n Fee products ever				Pre-emergent while soil temps are above 70 degrees			Apply post emergent as needed - no Weed n Fee products ever		
<b>Aerate</b>				Aerate just before you compost. Best done when lawn has adequate soil moisture.									
<b>Compost</b>	Compost anytime. Spread 1/2" of organic compost across entire lawn.												
<b>Sodding</b>			Best time to sod			Avoid sodding			Best time to sod				
<b>Fertilize</b>			Add balanced, organic fertilizer after you've mowed twice. No fertilizer on summer-stressed grass. Apply nutrients based on soil test results.							Make the last application 4 to 6 weeks before the first frost.			
<b>Dethatch</b>	Do not dethatch. It is not necessary for St Augustine grass and keeps it from spreading and thickening.												

The Defined Irrigation Schedule allows programmable irrigation systems to water two days a week. Its is always in effect.
